Technical measures: Handle in accordance with good industrial hygiene and safety practice. Prolonged inhalation of this material may cause benign pneumoniosis called baritosis from barium sulfate contained in this product. Accumulation and dispersion of dust with an ignition source can cause a combustible dust explosion, keep dust levels to a minimum and follow applicable regulations.

Local and general ventilation: Ensure adequate air ventilation.

Precautions for safe handling: Use only non-sparking tools. Keep away from heat/sparks/open flames/hot surfaces. – No smoking. Handle in accordance with good industrial hygiene and safety procedures.

Prevents handling of incompatible substances or mixtures: Store away from. Strong acids, strong bases, strong oxidizers.

7.2. Conditions for Safe Storage, Including Any Incompatibilities

Technical measures: Proper grounding procedures to avoid static electricity should be followed. Ground/bond container and receiving equipment. Use explosion-proof electrical, ventilating, and lighting equipment. Comply with applicable regulations.

Incompatible substances or mixtures: Refer to chapter 10.

Storage conditions: Store in a dry, cool and well-ventilated place. Keep container closed when not in use. Keep/Store away from extremely high or low temperatures, ignition sources, incompatible materials.

Material used in packaging/containers: No data available
